Small Cyclone S.E. of Didsbury

Hail fell in Didsbury on Monday afternoon as the heavy clouds passed over the town, but the storm increased in intensity as it travelled east and developed into a small cyclone as it reached the district about 12 miles southeast of here, when much damage was done to barns, granaries and outbuildings in that district.

The barn on one of Mr. Ed. Reid's places occupied by Mr. Neufeld was completely destroyed and several calves killed and a cow badly injured.

Granaries and other buildings were destroyed and the roofs were blown off several barns. After the storm a number of gas barrels were found scattered over the fields.

Hail accompanied the storm and windows in a number of houses were broken.

Damage was done on the farms of Levi Siebert, James and Sid Bouck, Edgar Charlton and E. Rieder.

Hail was reported east of town and damage was reported by J. Filketh, O. N. Ausenhaus and E. Barnes.

Sad Drowning Accident

Little Bernie Fulketh, 21 month old son of Mr. and Mrs. Russell Fulketh, was drowned on Saturday evening when he fell into the water, drowning on his father's farm after having strayed away from the yard.

The father had been playing with the little fellow in the yard up to about 7 o'clock when he went to commence milking, and had only nicely started when he was called back to find the child dead.

Every precaution had been taken to keep the children from the water, and a board fence was constructed around the pump, but the boy squirmed through the fence and fell into the tank.

Dr. Evans was called, and on his report to the coroner an inquest was deemed unnecessary.

The funeral was held at the Knox United Church on Tuesday, June 12, Rev. H. J. Wood taking the service.

Travelled 100,000 Mls.

Cars that have travelled 100,000 miles are read of but not often seen.

The speedometer on the Chevrolet delivered by Ed. Marcellus registered 102,000 last weekend.

This car was purchased from the Adshead Garage in December 1931, and Ed. says it is still going strong.

Automobile and Truck Collision Proves Fatal

One person was killed and others injured in an automobile and truck accident on the Calgary-Edmonton highway Friday.

Mrs. Lena Horchka, of Roycroft, in the Peace River country, died in the Calgary General Hospital on Friday night as a result of injuries sustained when a car in which she was a passenger collided with a truck driven by Fred Folkmann of Didsbury.

Others injured in the accident were Mr. and Mrs. Badyuk and Mrs. A. Rowlick, all of Roycroft, and Mr. Folkmann, driver of the truck.

The accident occurred 2½ miles south of Crossfield, where W. S. Fisher of Bowden had parked his car at the side of the highway to rearrange the goods in his trailer. The truck driven by Folkmann arrived on the scene from the south, and at the same instant the automobile containing the Roycroft residents approached from the north. They collided just as the parked automobile was being passed.

Bride & Groom Honored

Monday evening a large number of friends gathered at the Mt. View Bible School in honor of Mr. and Mrs. Harley Traub.

After an interesting program of music and speeches the happy pair received a goodly number of beautiful gifts, for which Mr. Traub thanked his and Mrs. Traub's appreciation of all that everyone had done. A surprise of 34 quarts of fruit and pickles was brought in following which refreshments were partaken of. The evening closed with many good wishes extended to the young couple.

Farm Women's "Rest Week," July 23 to 28

The Farm Women's Rest Week will be held at the Olds School of Agriculture this year July 23 to 28. There is no expense other than transportation and \$1.50 a day for board and room. Here is a chance to give your hard-working wife or mother opportunity to relax amid the beautiful surroundings of this institution. Full particulars regarding the lectures, demonstrations and entertainment will be sent on request in the course of a few weeks.

Turns First Sod for New E.V. Church

The ceremony of turning the first sod on the site of the new Evangelical Church was observed Wednesday afternoon last when a large number of members of the congregation and friends were present.

The first sod was turned by Mr. Wm. Rupp, who has been an active worker for the church since its establishment in Didsbury, and who was a member of the first board of trustees of the old church. Sod was also turned by other members.

The sod-turning was preceded by a devotional exercise conducted by Rev. H. J. Wood, Pastor, and the ceremony closed by all singing the doxology.

Band Will Play in Stampede Parade

The Didsbury Boys' Band has received an invitation to play in the parade at the Calgary Stampede on Monday, July 30th.

Director H. C. Liesemer informs us that the band will be accepted, and he will be pleased to hear from any car owners willing to assist in the transportation of the boys to the city.

Congregational Meeting

At the annual congregational meeting of the Evangelical Church held Monday evening last in the United Church the reports showed all the departments to be in a thriving condition. All church and missionary budgets were met in full, and the deficit of \$540.00 was reduced to \$10.00.

Mr. Wm. Rupp and Russell Berscht were elected trustees for three years to succeed themselves. G. O. Fogg was elected head usher, with George Dippel, H. C. Remie, Gordon Begett, Verne Wrigglesworth, Leonard Berscht and Jay Tugle as assistants.

Organize Swine Club.

A meeting was held in the High School last Friday evening for the purpose of organizing a swine club.

The business consisted of electing a president and secretary and deciding on the first meeting, which is to be a joint meeting of the calf and swine clubs, and will be held this Saturday forenoon, June 16th, at 9 o'clock at the farm of Mr. Norman Clarke. Mr. Parkinson of Olds will be present, and prospective members of both clubs should also aim to be present, as a good start means good progress.

The following were elected as the officers of the swine club:

President, Kenneth Burns
Secretary, Douglas Burns

A swine club supervisor was not elected, but Reid Clarke consented to fill in for the present.

At a previous meeting the following officers of the calf club were elected:

President, Delbert Levagod
Secretary, Vilma Liesemer
Supervisor, Reid Clarke

Mountain View Council Meeting

A meeting of the council of Mountain View municipality was held at Olds on Saturday afternoon with Reeve Flynn in the chair and all the councillors present.

There was considerable discussion on the departmental letter received regarding new legislation passed at the last legislature amending the Municipal Act, Tax Consolidation Act, Domestic Animals Act, etc.

The council decided to accept a grant of \$750.00 to be expended on market roads, which required that the municipality expend the same. The money will be spent \$50.00 on the Didsbury and Olds market roads.

A grant of \$100.00 was made to the Didsbury Agricultural Society provided that similar grants be made by the Town of Didsbury and the Westerville municipality.

It was decided to join the Central Alberta Association of Municipal Districts, which has recently been formed and which extends from Didsbury to Ponoka.

Mr. Floyd Albrigian was again appointed as weed Inspector for the season.

A number of applications for the consolidation of taxes were approved.

Complaints had been received of cattle grazing on the road allowances and it was decided to draw attention to the fact that this was contrary to the Domestic Animals Act by law, and that a notice be published in the Didsbury Pioneer and the Olds Gazette to that effect.

Matters of relief entailed considerable discussion, and the passing of pay sheets and accounts was the balance of business of the meeting.

Entertains at Shower.

Mrs. Russell Berscht entertained at a shower in honor of Miss Orpha Liesemer on Friday afternoon.

The shower took the form of a treasure hunt, and the bride-to-be found many beautiful presents. A dainty meal was served, with Mrs. J. V. Berscht pouring.

Those present were Mrs. George Liesemer, Mrs. Jack Pearson, Mrs. H. M. Reiter, Miss Florence Reiter, Mrs. W. G. Liesemer, Miss Evelyn Liesemer, Mrs. Reitzel, Mrs. H. P. Kenney, of Olds, and Mrs. J. V. Berscht.

WEEKLY SERMONETTE

"Changing something for the better, even if it is only a trifle—is worth more than proving that a thousand things are all wrong."

The Didsbury Boys' Band will give an open-air concert on the C.P.R. ground Saturday evening. These concerts are being greatly appreciated.

These are being greatly appreciated.

Japan Menaces World Peace

World opinion apparently is agreed that Japan is engaged in intensive preparations for war, primarily with Soviet Russia, and with hegemony of Asia and the Pacific as the direct objective. The evidences cited in support of that opinion are amenable to no other interpretation. There is no gainsaying the fact Japan has embarked on an imperialist policy strongly reminiscent of that which agitated pre-war Europe and which brought civilization to the verge of catastrophe.

Even the time has been set. It is claimed, by Japan's military experts, Armageddon will be let loose in the Orient late in 1935 or early in 1936. A world still struggling to escape the bitter aftermath of a Great War, then, at no far distant date, will be faced with another which, unless due precautions are taken, may complete the havoc of the last. The chancelleries of the world, the House of Commons at Ottawa, economists and statesmen generally, are satisfied Japan is headed for war.

What are the evidences which have provided front page stories for newspapers, leading articles for editors and journalists, texts for sermons and subjects for radio lectures, and which point so unmistakably to war in the Far East?

Ever since its Shanghai and Manchurian adventures, Japan has been showing its hand, and has made it plain that establishment of a dummy Kingdom Manchukuo, under its puppet emperor, did not satisfy Japanese ambitions with respect to the Asiatic mainland. Withdrawal from the League of Nations was but a considered step in a pre-conceived plan which envisaged war with Soviet Russia as a necessary preliminary to further imperialistic expansion. The recent ultimatum to the great powers designed to prevent financial or armament aid to China, is indicative of the fact that Japan proposes to exercise complete leverage over that vast territory. The ultimatum, construed as a trans-Pacific "Monroe doctrine", directly affects Great Britain and the United States, both of which have far greater financial interests in China than has Japan.

Furthermore, Japan is aiming at greater speed than any other country in the world. More than 10 per cent of its budgetary expenditures are earmarked for military purposes. The Japanese air force is among the most potent in the world. It is asserted the Japanese government is about to demand parity with Great Britain and the United States. So far as armaments are an augury, therefore, they point to not far distant war.

What of the economic aspect of the situation, perhaps the most significant of all?

That Japan should have imperialistic ambitions is, of course, a direct sequel to its adoption of western "machine" civilization. The growth of its industrial plant and productive power has been accompanied by a rapid growth of population. In ten years, Japan's population has increased from 56,000,000 to 66,000,000. It presses upon the resources of the country. Strangely enough, it has reached the same point at which Germany felt the urge for "elbow room" at all or any cost.

The entry of Japan into the Pacific islands has been enlisted in a gigantic effort to capture world markets. Systematic inflation of currency, ruthless exploitation of the masses, are component parts of the state's mechanism for development of export trade. Japan's exports have doubled themselves in three years. Against the flood of cheap Japanese goods, based upon world markets at "unreasonably low prices", tariff barriers have proved unavailing. Sixty per cent of Japan's production is exported. Britain and Germany, even in the heyday of their foreign trade expansion, never exceeded 25 per cent; the United States never has exported more than 10 or 12 per cent.

"Such a mass attack on world trade contains the seeds of its own destruction," says one writer who believes "the foundations will crumble beneath such excessive export trade maintained by the most fantastic exploitation of the native population. Through forced labor, child labor, sweatshop conditions, generally, Japan is selling abroad at less than production costs in Japan." The government is behind the productive machine and the export program. Because of its actions, capital equipment convertible to war purposes, multiples, dividends are high, while workers slave and their families starve.

How long will it last? The "machine" is geared to unit Japan is ready for war, and there is to be a race between preparedness on the one hand and national breakdown and insurrection on the other. War will be declared on first threat of the imminent crash.

Thus international experts read the handwriting on the wall. Can the counteraction for peace gain weight enough to prevent the catastrophe before Japan has reached the breaking point?

Abbey Gets Milk Bath

Indigo Westminister Abbey recently received a milk bath. Workers applied galloons after gallon of scalding milk to its massive arches, columns and its statues. The "inner man," Average Individual, had 77,000 meals in a lifetime according to statistics compiled by M. Davison, who presided at a meeting to clean the stone work, but to aid in preserving it. The results will be of market and grocery owners, restaurants and hotel men, national refrigeration experts and city health authorities at Cincinnati recently.

A Tired, Worn Out Woman Can't Make a Happy Home

There is no happiness in the home when the mother is sick and worried by the never ending household duties. She gets run down and becomes nervous and irritable, has shortages of breath, faint and dizzy, can sleep, and goes up in the morning feeling as tired as she went to bed, and is downhearted and disengaged.

Milburn's H. & N. Pills will soon convince woman it is not necessary to suffer, as they build up the nervous system and bring back the former health and vigor.

Old London Growing Fast

Every Year 150,000 People Added To Big Metropolis

Figures have been quoted by American statisticians to show that within so many years New York will be a larger city than London. Presumably that means Greater New York and Greater London, because the working population of both cities, as is the case with all large centres, is owing to vastly better transport services, living in the outer rings of the metropolis.

New York is still about a million and a half behind, and if it is going to catch up on London it will have to do so in a hurry.

Lord Ashfield, the Englishman who

once drove a street car in Detroit, and who is now the chairman of the London Passenger Transport Board, has found out exactly the traffic needs of Greater London. He told an audience the other day that London is attracting new industries at the rate of 1,000 per annum. London doesn't ask for them. They just want to locate in the midst of the largest assemblage of human beings in the world. By this means 750,000 people have been added to the population within the past decade, and there are 50,000 new houses built each year.

London is growing, therefore, at the rate of 150,000 persons a year—virtually another big city is joined onto London every twelve months.

At that rate plus the present million and a half, London, New York is engaging in a hopeless chase if trying to overtake London. — St. Thomas Times-Journal.

Another Fad Diet

Bananas And Skim Milk Latest Idea For Reducing

One more is added to the list of fat diets for reducing. This one, consisting of bananas and skim milk, is reported to have the recommendation of a physician connected with the Johns Hopkins University. Bridge table conversations doubtless may be devoted to the new skim-milk-banana gospel.

With the banana and milk deprived of cream are acknowledged to be wholesome foods. But the fact remains that there is real danger in issuing for general application any prescription no matter how great the authority as inferring it. What may be good for one person for accomplishing any particular change, may be positively harmful to another seeking the same result.

Those who want to reduce should not take the advice of a friend even if that advice is passed on from a physician's directions based upon a careful physical examination. The same physician might give entirely different advice to his patient's friend.

OFF COLOUR? HOW IS YOUR LIVER?

Wake up your Liver Bile

—Without Colonel

Your liver's a very small organ, but it certainly can put your digestive and eliminative system in top condition. Colonel is a special preparation that purifies your body from the inside out. It cures you of constipation, gout, rheumatism, etc. When you're taking Colonel, how they're though—and you need a doctor's advice.

Carter's Little Liver Pills will soon bring back

Colonel's old-time fame. Ask for them by name. Refuse substitutes. About 25 drams.

Unusual Use For Honey

As Foundation For Golf Balls It Is Excellent

The uses to which honey is put are many and various, but perhaps the most unusual is in making golf balls. The honey is placed in a round stout rubber sac and is forced in under tremendous pressure. Around this the usual rubber is wound and it has the ordinary outside. It is said that honey, being non-evaporative and virtually unaffected by time or temperature will give a ball that will stand up under all conditions.

"My husband wired me from Paris on my birthday asking whether he should buy me a Rembrandt or a Titian. Now which would you have?"

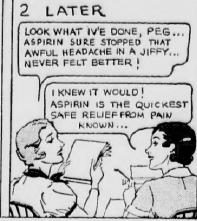

"Well, as far as that goes, most of these French cars are very good."

According to astronomers, our earth appears blue to the people, if any on Mars

Ease Pain, Headache in Few Minutes

1 PEG, I'M FRANTIC, THIS WORK MUST BE DONE - AND I'VE A SPLITTING HEADACHE

2 LATER

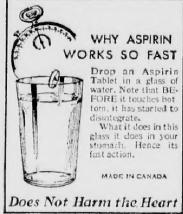

For Quick Relief Say ASPIRIN—When You Buy

Now comes *unexpected quick relief* from headaches, rheumatism, neuralgia . . . the *fastest safe relief*. It's said, *discovered*.

Its results are due to a scientific discovery. An Aspirin Tablet begins to dissolve, or disintegrate, in the amazing space of seconds after taking the medicine. And hence the "headache of pain" a few minutes after taking.

The illustration of the glass, here, shows an Aspirin Tablet starts to disintegrate almost instantly when you swallow it. And this is ready to do its work instantly.

Do you pay? No. You can afford to buy Aspirin. To be sure you get ASPIRIN'S *quick relief*, be sure the name *Buyer in the form of a cross* is on every tablet of Aspirin.

Radio Is Still Wonderful

People Who Think Never Fail To Get Thrill

The public has heard so many wonderful broadcasts transmitted across oceans and continents that it has grown blasé and almost ceased to get a thrill out of them nowadays. But those who still do a lot of thinking have been rebuked in that they fail sometimes to be moved.

In connection with the previous Bryd Antarctic expedition there was a remarkable incident. The New York Times radio editor was sitting in his home in Brooklyn talking to Bryd in the middle of the fourth month, and threatened the patient with libel. To obtain access, the surgeon had to dislodge the hemispheres of the brain. The patient was apparently completely relieved.

Removes Brain Tumor

Marvel Of Surgery Reported From Leningrad

Removed of a brain tumor from a young girl under local anesthetic by Prof. Pilevnik at the Leningrad Institute of Traumatologic was hailed as a marvel of surgery.

The tumor, the size of a pigeon's egg, was in the middle of the fourth ventricle, and threatened the patient with blindness. To obtain access, the surgeon had to dislodge the hemispheres of the brain. The patient was apparently completely relieved.

Few precedents for this operation are cited in world medical annals.

A Novel Clock

An amusing clock has been designed which at first sight resembles a picture of rather modernistic "flowers," a group of stems springing from the base, curve over slightly and sprays over the clock face so that the blossom topping each falls into the place usually occupied by the numerals. The clock hands are shaped like two slender leaves. This novel clock is said to be quite easy to read.

There are still some thrills left even in radio. — St. Thomas Times-Journal.

Famous Painting Found

Picture By Millets Passed Out Of Notice In 1873

After many years of search, Millets' famous "The Angelus" is now owned by the sister of the model. The picture, which was the chief prize of the Royal Academy Exhibition of 1873, shows a young woman reading a letter in which she has refused a marriage proposal. The original sitter was Miss Dorothy Tenant, who afterward became Lady Stanley, wife of Sir Henry M. Stanley, the explorer. It was once sold for \$7,000. The recent buyer was Mrs. F. W. Myers, sister of the late Lady Stanley. She had been searching for it for years, but it passed out of notice when bought privately shortly after the 1873 Academy exhibition.

Over Six Million Trees Being Distributed This Spring Among Farmers Of Prairie Provinces

Dust storms sweeping across the three prairie provinces will soon have another obstacle to contend with as 3,600,000 baled trees and 200,000 carloads find a resting place somewhere in the efficient farming areas of Alberta, Saskatchewan and Manitoba.

From 300 to 400 miles of trees will leave the forestry station at Indian Head and its sister plantation at Sutherland to farmers who have interplanted themselves in trees for the sake of their beauty, and also as a method of combating the dust storms that have been playing havoc in the three provinces for some time.

A recent census of farms of the three prairie provinces covered by the forestry service show that of the 28,079 farms nearly 200,000 of them are not wooded. Since its inception in 1901 the forestry farm has supplied 50,452 of these with at least some trees. There are still close to 150,000 to be supplied.

Since its inception the forestry farm at Indian Head and Sutherland have supplied 115,390,074 deciduous or broad leafed trees and 2,035,866 conifers or evergreen trees to the farmers of the three provinces.

Drouth has had its effect on the work and in such areas the demand has been somewhat lessened, but the officials believe that as soon as normal conditions prevail the demand from these areas will be greater than ever. Where trees have been planted before the drouth people have not been as hard hit as in other parts as it was always possible to grow a good garden where a shelter belt had been set out.

Loss of the inspectors as a result of an economy move is partially being overcome by keeping in close contact with the parties receiving trees by mail and submitting them to different questionnaires regarding growth, etc. In this way close to 90 per cent of the people interested are heard from and data gathered for reference work.

All the labor is not in the shipping of the trees. Before the evergreens are shipped out they have reached an age of four or five years. Pines are four years old when they leave the farm. Maples and caragans are the speediest and require only a year's growth before shipping. Ash and elm require two years. Poplars and willows are shipped from cuttings.

Machine-like precision is the feature of the shipping department as between 25 and 30 men ship out the 6,000,000 trees in just over two weeks of time. Out of the plots the evergreens are lifted and the roots are soaked in mud to preserve them. From here they go to the nest shed where they are sorted into the right sized bundles, labeled and addressed. Then they are sent. Next is the wrapping and sewing and thence into the truck for delivery to the freight sheds. And so to the end.

When the shipping is done another party of work starts for forestry officials. Four locations on the active planting list for 1935 number 5,000. Before the next season rolls around these will all have to be communicated with and all particulars necessary to the successful culture of the trees ascertained. Then a planting plan is made for each individual farm with suggested arrangement and all particulars for the best methods of growing, etc., to ensure as great a return as possible from the trees sent out.

Making Synthetic Diamonds

Professor Obdulio Fernandez, head of the Medical (Spanish) University's pharmacy faculty, reports progress of chemists in making small diamonds synthetically and believes larger synthetic diamonds are a commercial possibility of the near future.

Two men sat at the bar drinking beer. Presently one of them said: "Do you know, Dick, I think I'll buy this hotel."

"Wait till we've had a few more drunks," said Dick, "and I'll sell it to you."

Frozen Terrain Of Arctic

Russia Opening New Trade Route Around Northern Siberia

Russia is reaching out to make use of her frozen territories in the Arctic. It was revealed by Dr. Otto Schmidt, leader of the Soviet scientific expedition shipwrecked on the ice floes of the north while opening a new trade route around Northern Siberia.

Using heavy ice breaking ships, the Soviets hope to open vast resources of gold and oil in frozen Siberia, using the ports of Vladivostok and Archangel, he said.

The brown-bearded man who kept up the morale of more than 100 Russians when they were stranded for many weeks on the hazardous, ever-splitting ice floes of the Arctic ocean by the wreck of their ship, the Cheluchkin, said he hopes to come home in a few months with a new Soviet expedition to complete his scientific and exploratory work.

Three nations won the frontier in his Wrangel Island expedition sought to open before they were stranded on the ice, then rescued by an airplane expedition.

The United States navy in cooperation with the coast and geodetic survey, plans to map the rocky Aleutian Islands this summer. It is common talk Japan keeps a wary eye on the territory. Now Russia reveals she can cover it by airplane and boat, through the Schmidt expedition and the rescue forces under command of Professor George Ushakov.

Dickens Liked Canada

Famous Author Was Visitor Here Eighty-Two Years Ago

On his arrival in Montreal nearly 80 years ago Charles Dickens, English author, was impressed by Canada's quickly changing seasons and by the permanence of Montreal's roads, buildings and public works. One proof of this statement is that Ross's hotel where Dickens himself stayed at that time is still standing, formally perhaps, but none the less a memento of the famous writer's visit.

Dickens arrived in Montreal from Toronto early in May 1852 years ago to help a local theatrical company who had extended him an invitation to aid them with his advice. In his letters home Dickens dwelt plentifully on the different stages of his journey and of what he met with.

He told how Montreal was situated, about the streets and shops and different suburbs, and was enthusiastic about his Canadian visit generally. At one point he wrote "Spring comes so rapidly here that it is but a day's leap from barren winter to the blooming youth of summer."

Machine-like precision is the feature of the shipping department as between 25 and 30 men ship out the 6,000,000 trees in just over two weeks of time. Out of the plots the evergreens are lifted and the roots are soaked in mud to preserve them. From here they go to the nest shed where they are sorted into the right sized bundles, labeled and addressed. Then they are sent. Next is the wrapping and sewing and thence into the truck for delivery to the freight sheds. And so to the end.

When the shipping is done another party of work starts for forestry officials. Four locations on the active planting list for 1935 number 5,000. Before the next season rolls around these will all have to be communicated with and all particulars necessary to the successful culture of the trees ascertained. Then a planting plan is made for each individual farm with suggested arrangement and all particulars for the best methods of growing, etc., to ensure as great a return as possible from the trees sent out.

Making Synthetic Diamonds

Professor Obdulio Fernandez, head of the Medical (Spanish) University's pharmacy faculty, reports progress of chemists in making small diamonds synthetically and believes larger synthetic diamonds are a commercial possibility of the near future.

Two men sat at the bar drinking beer. Presently one of them said: "Do you know, Dick, I think I'll buy this hotel."

"Wait till we've had a few more drunks," said Dick, "and I'll sell it to you."

Lord and Lady Baden-Powell are shown returning to England after a long cruise in the Mediterranean with 700 scouts and guides. Lord Baden-Powell, who has been seriously ill, is shown being assisted by Lady Baden-Powell. The Chief Scout is to visit Canada next year if his health permits.

By Ruth Rogers

SMART JACKET DRESS

Slenderizing lines for matrons or for younger women rather heavy of figure, a simple to make is this charming jacket dress for the day's pattern. Strikingly bias lines create very slenderizing effect. The sleeves can be made of a soft material and look very charming.

The original in twin prints is navy and white crepe silk is very practical and through the summer is perfect for week-end vacations and travel.

Other lovely schemes in cotton prints, pastel and white rib silks, Indian prints, etc., are smart and indispensable for your summer wardrobe.

Style No. 677 is designed for sizes 36, 38, 40, 42, 44, 46 and 48 inches bust.

Size 36 requires 3 1/4 yards of 36-inch material with 2 1/2 yards of 36-inch contrasting. Separate coat requires 2 1/2 yards of 36-inch material.

Costume pattern 20 cents in stamps or coin (cash is preferred). Wrap coin carefully.

United States Scientist Predicts Period Of Great Floods, Based On Effect Of Huge Sunspots

Canadian Claims Priority

Montreal Resident Says She Was First Woman Journalist

Recent press dispatches which spoke of an American, Mrs. Anne Royall, as the first woman journalist and the first of her sex to own and edit a newspaper have stirred the ire of Mrs. Katziah, resident of Montreal.

On both counts Mrs. Massiah claims priority over Mrs. Royall. In addition she claims to have been the first journalist of either sex to be a professional "interviewer."

"I began in October, 1871, on the Montreal Herald and was interviewing from that till 1878, when I was married," said Mrs. Massiah.

In 1888 I was editor and proprietor of the Independent in Lachine, Quebec, which beats out Miss Royall by some years. Before that I was assistant editor of the Lachine Waterman."

"In 1859 I reported the proceedings of the House of Commons from the Speaker's gallery. I covered the debates on the national policy."

"I was the first woman to be member of a press association. That was in September, 1889."

"There are several other facts to my credit and I am just old enough to want credit placed where it is due."

Grade C Eggs

Always A Demand For Low Priced Eggs

A feature of the egg market at the present time is the heavy demand for grade C eggs, says the Department of Agriculture Egg and Poultry Market Review. There is, of course, always a demand for these low priced eggs, but it seems to be accentuated this year by the fact that supplies of this grade are relatively scarce. The wraith thus far has been cool and comparatively few poor quality eggs are being marketed. The eggs going into grade C at the present time are largely produced chiefly on account of size or dirt. The producer, in most instances, is not able to extend any individual contour to egg size, but dirty eggs can be avoided by reasonably clean production conditions and would result in considerable extra profit to the producer.

Style No. 677 is designed for sizes 36, 38, 40, 42, 44, 46 and 48 inches bust.

Size 36 requires 3 1/4 yards of 36-inch material with 2 1/2 yards of 36-inch contrasting. Separate coat requires 2 1/2 yards of 36-inch material.

Costume pattern 20 cents in stamps or coin (cash is preferred). Wrap coin carefully.

Rome Celebrates Birthday

The 26th birthday of Rome was celebrated April 21. Premier Benito Mussolini and inaugurated many public works and dedicated on behalf of the city a monument to Simon Bolivar, erected outside the national stadium by Venezuela, Peru, Ecuador, Chile, Colombia and Panama.

Admires Canadian Rockies

Great floods throughout the world in 1936-38 were reported by Captain Thomas J. See, veteran professor of mathematics in the United States navy. He based his forecast on the effect of huge sunspots.

Rainfall will increase for the next two years, after which the floods will occur, said Captain See, adding that the sunspots cause the weather variation by mixing hot and cold air through lessening the heat of the earth, thereby permitting the cold currents of air to descend.

Captain See, with 45 years' experience in scientific work, collaborated for many years with the late Rev. Jerome S. Ricard of Santa Clara University in the study of Father Ricard's theory that sunspots cause weather changes.

"The increase of sunspots began in 1928," Captain See declared, "very great droughts have been observed in nearly all the countries of the globe, notably the south of 1930 in the Mississippi valley, which accentuated the evils of the depression, and that of 1933, which delayed agricultural recovery."

"But now large sunspots have appeared, and will increase for the next four years, yielding vast floods in 1936-38, and an increasing rainfall this year and next, after which the floods will become floods, as during the Mississippi floods of 1927."

"The sunspots mix hot and cold air much like the mountains, yet act in a slightly different way, by cutting down the heat of our globe, thereby letting the cold currents of air descend nearer the earth, for mixing more rain. That is the whole meteorological effect of sunspots."

Admires Canadian Rockies

Thrilling Ski Journey Across Coast Range Of B.C.

High lights of a thrilling ski journey across the coast range of British Columbia from Toba Lake were given by Sir Norman Watson, of London, England, speaking under auspices of the United Service Institute, Ottawa.

Sir Norman was enthusiastic with regard to the possibilities of British Columbia as a paradise for the ski devotee and also expressed the view that Banff could become the Mt. Moritz of the Dominion.

How blizzards were defied by the Alpine skiing party were explained by the speaker. He said that at one time it was necessary to cut 2,000 steps in the fury gap ice wall and also dwell on the hardship of a struggle through dense brush to Knight Inlet.

The distinguished visitor remarked that he was empiric-minded in many things and this applied to skiing. He thought the scenery of the coast range was unsurpassed in beauty and was unequalled as far as skiing attractions were concerned in the temperate zone.

Established Eight Centuries

Smithfield Meat Market In London Largest In World

Most farmers throughout the Empire have heard of Smithfield Market, or of Smithfield Show. Smithfield is London's meat market not very far from St. Paul's Cathedral, but the show of that name is held at Birmingham and a long way from the meat market and is merely a circumlocutory display which has no connection with the meat market other than adapting the name.

Smithfield Market, the largest dead meat market in the world. Last year 1,000,000 head of meat and poultry were traded there. Four out of every five carcasses of Australian and New Zealand mutton and lamb went to Smithfield, and two-thirds of the cattle and reported from those countries and from the Argentine.

Annual Christmas time as much as 5,000 tons of meat and poultry are sold there in one day. The annual wholesale value of supplies amounts to about \$10,000,000.

There has been a cattle market at Smithfield for over 800 years. Sir Thomas Finsbury.

Oats for Sheaf Feed.

In the drier areas where perennial grasses are not a paying proposition due to uncertainty of catch and low yields, the man who uses horses and has some stock has depended on green oat sheaves as his staple dry forage. They are also used extensively in the more humid areas as a dual-purpose crop for forage and wild-oat eradication.

Oats for greenfeed may be sown at any time from early spring until the first of July with fair assurance of a crop, though May sowing will usually give the highest yield. Very late sowings are likely to be badly rusted or touched with frost.

In tests conducted at the Dominion Experimental Station, Rosthern, Saskatchewan, it was found that the greatest tonnage per acre was obtained when the oats were harvested when turning green. While the grain after heading, however, the straw was more palatable, and while the grain content was much lower, sheaves in this condition would make much better feed for certain classes of livestock.

In using oats to eradicate wild-oats a good practice is to cultivate the stubble land in the fall or early spring to start weeds on the surface to grow. When the wild-oats are 4 to 6 inches high plow and harrow or pack and seed immediately to oats. The oats are cut with a binder when turning, or earlier, and put in stacks of about 9 sheaves. When dry they may be stacked. The desired growth of wild-oats before plowing will usually be obtained early in June, and after this date few of the remaining wild-oats seeds will germinate.

Motor Output Jumps.

Figures from Ottawa, revealing marked increase in Canadian motor car production, are clearly remarkable. The tremendous gain in export business during the four months exports were four times greater in the same period last year. Domestic activity to date has been gratifying and is still on the upward climb, as indicated by figures just released from General Motors of Canada, Ltd., at Oshawa, Ontario. An interesting item in the Oshawa figures is the statement that by 1st of June 51,000 more General Motors cars had been delivered than during the whole of 1933. Truck deliveries have been twice as great, and export deliveries more than four times as great. June production schedules will be at a high level.

Linking Oranges and Wheat.

The longest international highway in America is said to be the Sunshine Trail which connects Los Angeles on the south with the far-famed Peace-River country in the north. This route is now completed for practically the entire distance as an all-weather highway with the exception of a section on the northern end, which is improved earth road. The highway not only links California's orange groves with the wheat country in the Peace River district, but also connects the national park and mountain resorts of the western states with those of the Canadian Rockies in Alberta.

Calgary Tennis Players Win Over Didsbury

Calgary tennis players made a clean sweep of all matches against local players when they met in a friendly tournament at Didsbury on Sunday afternoon.

Eight matches were run off, with the Calgary players dominating play throughout and giving a fine exhibition of the game. Although outclassed on the courts the Didsbury players put up interesting competition and will gain much experience from the match. A return match is promised the Calgary players for early in July.

Refreshments were served on the grounds by the social committee of Mrs. McFarquhar, Orpha Liesemer and Alice Pearson, assisted by Win Storer.

Results:

Dick Hincks defeated Art Reiber
Dick Hincks defeated Al. Russell
Dick Hincks and Phil Hincks defeated Tom Roysd and Jim Eubanks
Stan. Nield and Tim Stark defeated Frank Raymond and Lorne Frey

Mrs. Hincks defeated Miss Grant
Mrs. Hincks and Mrs. Seeson defeated Alice Pearson and Irene Bellamy

Stan. Nield and Mrs. Seeson defeated Fred Evans and Orpha Liesemer.

Tim Stark defeated Alf. Brusso.

Board of Trade Will Meet June 25

Arrangements are being made to hold a meeting of the Board of Trade on Monday, June 25th. Mr. Carpenter, principal of the Calgary Technical School, will give a talk on "Down North."

New Deputy Minister of Municipal Affairs

E. L. Gray, provincial field crops commissioner for the past four years, and one of the best known government executives in the west, was appointed to the position of deputy minister of municipal affairs Saturday morning last, succeeding Robert English who resigned some time ago. The announcement was made by Hon. R. G. Reid, minister of municipal affairs. Alex Souter, assistant deputy minister, has been acting in the position since Mr. English's retirement.

W.I. Conference, United Church, Thurs., June 28

The constituency conference of the local Women's Institutes will be held in Knox United Church, Didsbury, on Thursday June 28th commencing at 10:30 a.m. Mrs. Ferguson, provincial president, is expected to be present.

Baseball Meeting.

Baseball meeting tonight (Thurs.) at 8 o'clock in C. E. Reiber's office.

Tennis Meeting.

The Tennis Club will hold a special meeting on Tuesday, June 19th to consider rebuilding the courts.

EVANGELICAL NOTES

The sermon subject at the Evangelical Church service on Sunday morning will be, "Seeing God."

BIRTHS

Tuesday, June 12—to Mr. and Mrs. Ed Klinck a daughter.

Wednesday, June 13—to Mr. and Mrs. Percy Lunt a son.

WEEKLY JOKE

Two Liverpool butchers were competitors:

"Sausages one shilling the pound!" was the announcement in the window of the first shop.

"Sausages tenpence the pound!" was over the door of shop No. 2 next day.

"Sausages under one shilling cannot be guaranteed," was the come-back of shop No. 1.

"We furnish sausages fit for the king," was the amazing stroke of shop No. 2.

But shop No. 1 was not to be outclassed by such methods, and to settle the argument this sign appeared in front of shop No. 1 next morning—"God Save the King!"

NOTICE

Notice is hereby given under Section 48 of the Domestic Animals Act [Municipalities] that One Bay Mare about 3 years old, with foal, two hind feet lame, and lame in the right fore foot, was impounded in the pound kept by Mr. J. Scheidt, and located on the S.W. 1/4 W. 16-31-15 on the 15th day of May A.D. 1934, and that said animal was sold on the 31st day of May A.D. 1934 to John Bogner of Didsbury.

Said animal may be redeemed by the owner or on his behalf within a period of three days from the publication of this notice in The Alberta Gazette, upon payment of all fees and costs due to the municipality and the purchasers of said animal.

For further information apply to the undersigned.

WORLD HAPPENINGS BRIEFLY TOLD

The N.R.A. has decided to impose a code upon the telegraph industry in the United States.

Capt. James Mollison has entered in the Empire-to-Australia air race. He will fly with his wife, the former Amy Johnson.

Testing the Mackenzie river inland water route to the north, the Hudson's Bay Company will ship 500 tons of supplies from Edmonton this season for its posts in the western Arctic region.

Speaker Henry Rainey said he understood President Roosevelt intends to make a war debt settlement with Finland, which is not in default, and then recommend a similar agreement with other nations.

Canada's membership in the League of Nations has cost her \$3,200,574.96 in her contributions to the league since 1919, according to an answer given in the House of Commons.

Amateur whale hunting under the guidance of experts is to be one of the vacation attractions in Manitoba's seaport this year. J. F. S. Fletcher, chairman of the tourist committee of the Churchill Board of Trade, announced.

The government announced that the King and Queen have agreed to go to Glasgow at the end of September to launch the new giant Cunard liner "SS" "534." Her Majesty, the announcement said, will perform the actual ceremony of launching the vessel.

Ernest S. Portland, student in the technical graduate studies at Toronto University, has been awarded a University of Alberta research scholarship valued at \$600. He will leave for Alberta in September to conduct investigation after rabbit periodicity.

Horses from Alberta ranges may soon gallop about the green pastures of the Fiji Islands. Dealers in the Caledon district, if present negotiations are successful, expect to ship a boatload of light draft horses to the Fiji Islands via Vancouver shortly.

Wise Spending

Wise spending is the only thing that keeps business going. Nigardly economy has no place in world's progress. The great trouble with us these days, as we see it, is that in time of plenty we did too much foolish spending. Instead of obliging ourselves for debts that meant investment, we launched an orgy of spending for spending only, in which business was not considered and pleasure only thought of.

A comet seen in 1843 had a tail 150,000,000 miles long.

STUNNING DRESS FOR MATRONS AND YOUNGER WOMEN WHO FEEL THEY COULD WELL SUPPORT A FINE SLIMMING LINGERIE LINES

Today's model lends itself most admirably to the spring crepe silk prints in navy and white, brown and white, and navy and white.

The yoke at the front of the bodice is slimming the way it ends in a tied sash. The slim skirt cut with a lengthening panel at the front, gracefully draped in its softly slightly flared fulness.

Another interesting scheme is navy blue crepe silk with the deep pointed lines of the bodice and the slimming waist of crisp white embroidered organdie.

Style No. 700 is designed for sizes 36, 38, 40, 42, 44, 46 and 48 inches bust.

Size 36 requires 3½ yards of 39-inch material.

Price of pattern 20 cents in stamp or coin (can is preferred). Wrap can carefully.

Must Learn To Swim

All French officers will have to sink or swim in the future. Marshal Pétain, minister of war and venerable defender of Verdun, has issued an order that swimming will be part of the entrance examinations to all French military schools from now on. It is the marshal's intention eventually to equip all military camps with swimming pools where soldiers will be obliged to learn how to keep afloat.

Little Journeys In Science

(By Gordon H. Guest, M.A.)

METALS

Interesting examples of the practical applications of science to everyday life may be found in the production and use of metals. The metals known to the ancients were gold, silver, copper, lead, tin and mercury. Gold and copper have been used since prehistoric times, and it is likely that these were the first metals to be used. In the middle of the 18th century the only metals in common use were copper, tin, zinc, and the mixtures or alloys called bronze (copper and tin) and brass (copper and zinc). Steel is simply a form of iron containing small amounts of carbon and other substances.

Aluminum was discovered in 1825 and was at first very rare and valuable. It is a metal of great value. It could be manufactured by the French chemist Deville. In 1856, C. M. Hall, a university student, invented a method of producing aluminum by the use of electricity. By means of this new method aluminum was produced cheaply in large quantities, and the metal is now used extensively. Science has not only discovered a method of extracting aluminum from clay and most of it is obtained from the mineral bauxite.

Magnesium is another metal which was not known until early in the 19th century. This metal is also obtained by an electrical method. An alloy of magnesium with aluminum known as magalum has great strength and is very light. This alloy is only about twice as heavy as an equal volume of water, whereas steel is about 10 times as heavy as water. Alloys of this kind are used in air ships and motor construction.

Many valuable metals are produced by mixing or alloying, simple metals. For centuries man has known how to make such metals as tungsten, molybdenum, vanadium and cobalt. These special steels are used in the manufacture of chemicals, tools, parts of aircrafts, railroad tracks and the steel for bridges.

Today's model lends itself most admirably to the spring crepe silk prints in navy and white, brown and white, and navy and white.

The yoke at the front of the bodice is slimming the way it ends in a tied sash. The slim skirt cut with a lengthening panel at the front, gracefully draped in its softly slightly flared fulness.

Another interesting scheme is navy blue crepe silk with the deep pointed lines of the bodice and the slimming waist of crisp white embroidered organdie.

Style No. 700 is designed for sizes 36, 38, 40, 42, 44, 46 and 48 inches bust.

Size 36 requires 3½ yards of 39-inch material.

Price of pattern 20 cents in stamp or coin (can is preferred). Wrap can carefully.

Blind Man Expert Golfer

Helped Win Match In Cornwall, England

Playing with three others with perfect sight, a blind man helped win a golf match on the 18th hole at the British Museum in Cornwall, England, recently. Eighteen holes were played. Capt. Gerald Lowry, the first British officer to lose his sight during the World War, was partnered by Sir Wilson Hungerford, and they defeated Sir George Wilkinson and Lieut.-Commander E. R. Gibson by one hole. Sir Wilson, after the round, said he was amazed at his partner's skill. "I placed the ball on the tee for Captain Lowry," he said, "and then guided his club to within an inch of the ball. Then he swept back his club along the ground and with a half-swing, came down on the ball with all his might. Often he drove the ball 130 yards. With his iron he the rough his skill was surprising."

Do you find it hard to do things some days? Does when body and brain feel expressionless? Do you feel like you are not yourself? probably the reason. It is most likely the reason that you are not feeling well. If you are not in your daily habits, because regularity is no guarantee of health. Regularly, along with a healthy diet, will help you to feel better. Get lots of fresh air and exercise, and you will feel better. For a good start, start your day with a glass of Andrew's Liver Salt. Andrew's Liver Salt is a natural system and helps Nature and those tired, worn out muscles to get back to work from your dragging. 35c and 60c in the 75c for the 100c. Call or write to Andrew's, 2000 King Street, Cincinnati, Ohio. Agents: 3

Has Discovered Reason

Writer Knows Now Why He Does Not Play Bridge

To a good many of us, contract is a discouraging game on the face of things. Its intricacies bewilder us but when mathematicians get to figuring the game on a scientific basis the results are truly appalling.

The Literary Digest, for example, informs us that no less than 635,559,600 bridge hands are possible, six hundred and thirty-five different combinations would be plenty, let alone 635,600,000,000. The wonder is that anyone whose mind is not used to handling astronomical calculations has the face to even sit down at a bridge table.

And hark to this. If a bridge foursome played continually day and night with a hand deal every five minutes, a perfect hand would appear in 377,290 years. To carry it still further, if you dealt yourself bridge hands every five minutes, you would not reasonably expect to look up the same hand twice in less than 6,600,000 years.

A good many people have asked us why we don't play contract and we were never quite sure. But now we know. —Detroit Saturday Night.

Steamship Freight Traffic

President Beatty Of The C.P.R. Sees Some Slight Improvement

Some improvement in steamship freight traffic due to results of the Imperial conference at Ottawa were reported by E. W. Beatty, K.C., in his presidential address to shareholders of the Canadian Pacific Railway. Mr. Beatty said the improvement, which was more marked towards the end of last year, occurred both in the quantity of the cargo and in the proportion of freight carried. The improvement resulted in increased revenue from the company's steamships. Mr. Beatty reported.

Speaking of shipping generally, he said, it continued in 1933 in a chaotic condition due to increased tonnage and to exchange fluctuation. The C.P.R., however, had established a strong position in the short cruise traffic operating ships on cruises out of European, United States, Canadian and Oriental ports.

Are You WEARY?

Do you find it hard to do things some days? Does when body and brain feel expressionless? Do you feel like you are not yourself? probably the reason. It is most likely the reason that you are not feeling well. If you are not in your daily habits, because regularity is no guarantee of health. Regularly, along with a healthy diet, will help you to feel better. Get lots of fresh air and exercise, and you will feel better. For a good start, start your day with a glass of Andrew's Liver Salt. Andrew's Liver Salt is a natural system and helps Nature and those tired, worn out muscles to get back to work from your dragging. 35c and 60c in the 75c for the 100c. Call or write to Andrew's, 2000 King Street, Cincinnati, Ohio. Agents: 3

Has Attracted Many

Record Crowds See Codex Sinaiticus At British Museum

Record crowds have been attracted to the British Museum in London to see the Codex Sinaiticus, the 5000-year-old manuscript of the New Testament of the Bible brought from the Soviet government. One day's attendance was 7,000, and from the opening to closing times there has been a line waiting to get into the building. Response to the public appeal for \$250,000 to complete the purchase of the work has been unusually generous. More than \$200,000 was contributed in a few days and the entire amount is expected to be raised within three months. The government will supply the other \$250,000. The museum officials have written to the Soviet government regarding a fragment of the Codex, about three inches long and one inch wide, which is missing. There is no question of it having been lost while the Bible was on the way from Russia, they say.

A Midget Automobile

Czechoslovakia is to have a midget automobile which will be retailed at less than \$100, according to a report from Prague. The motor is of the front-driven, two-cylinder type, developing 18 horsepower. The car will be 20 feet long and four-seater cabriolet, with a wheelbase of eight and one-half feet.

Canadian Drama For London

Suggestion Is Made By Adjudicator That Some Dominion Company Should Visit Old Land

The hope that in the near future one of the Canadian amateur dramatic groups which has been victorious in the Dominion drama festival may be seen in London, was expressed by J. T. Grein, veteran critic and essayist, who judged the festival this year.

If a Canadian company were successful in London it would receive "as it were, a universal hallmark," he added. He was aware that the main question involved was one of finance, but this might be solved if Great Britain and Canada were both willing to assist. If, for instance, the British Drama League would invite a Canadian entry to play in the London festival, there might be some way in which necessary financial arrangements could be made.

One important suggestion which he made was that there should be a special committee to select the plays for presentation at the festival next year. He referred to the "spell of gloom" which surrounded some of the performances at the festival just concluded.

"Theorem" suggested Mr. Grein. "I think that towards the next festival there should be established a small special committee to select plays so that humor may become a peer of gloom."

No Argument

After the locomotive had smashed a flivver at the crossing, a flapper from the opposite page unimpaired and passed her nose. The engineer and others gathered around.

"Why in the world didn't you stop when you saw the engine coming?" asked the engineer.

The flapper was indignant.

"I sounded my horn before you blew your whistle," she said defiantly.

DENICOTEA CIGARETTE HOLDER

DENICOTEA Cigarette Holder absorbs the nicotine, pyridine, ammonia and resinous and tarry substances found in tobacco smoke.

Complete holder with refills — \$1.00 postpaid, or from your Druggist or Tobacconist. Dealers wanted everywhere.

How Acid Stomach Makes Itself Known to You

HERE ARE THE SIGNS:
Nervousness, Restlessness, Indigestion, Loss of Appetite, Nausea.

WHAT TO DO FOR IT:

If you have Acid Stomach, don't worry about it. Follow the simple directions given above. This small dosage of Phillips' Milk of Magnesia acts *instantly* to relieve the trouble that causes headache, stomach pains and other distress. Try it. You'll feel like a new person.

But—be careful you get genuine Phillips' Milk of Magnesia, or Phillips' Milk of Magnesia Tablets when you buy—25¢ and 50¢ sizes.

ALSO IN TABLET FORM
Each tiny tablet is the equivalent of one teaspoonful of genuine Phillips' Milk of Magnesia.

Phillips' Milk of Magnesia

OCCASIONAL WIFE

By EDNA ROBE WEBSTER

Author of "Joretta," "Lipstick Girl" Etc.

SYNOPSIS

Camilla Hoyt and Peter Anson, young and in love, marry secretly, deciding to live their own lives apart until Peter is able to provide for her. Peter is a young man with a will, trying to win a competition for a scholarship abroad and Camilla is the adopted daughter of a wealthy family. She is not to inherit money when she reaches twenty-one, so she is studying commercial art in the hope of landing an agency job. Others in the story are Avis Worth, another wealthy girl who is engaged to Peter; Marvin Todd, Peter's friend, and Gus Matson, his former roommate with whom he has quarreled. After a party at an exclusive club, where the two young couples of the party go to a cabaret to continue the gaiety, Peter and Camilla slip off to the beach by themselves and fall asleep on the sand. When they awoke it was morning. Avis and another boy are standing near them. This makes it necessary for Camilla to announce before the party that she and Peter are married. Avis Worth rents a studio on the beach floor as Peter and Camilla are reconciled. Avis invites them to a party, at which she introduces Peter to well-known artists and public men. (Now Go On With The Story)

CHAPTER XLIII.

Terry rebuked Camilla gently when he danced with her. "Aren't you a little sorry for the way you deceived and then deserted us all? I'll never be the same again, since I lost you," he sighed.

He was probably as sincere as he could be about anything, but

Camilla knew that he could not have been deeply affected. "Perhaps it is just as well you are changed," she taunted him, laughing. "Besides, I didn't desert the crowd just because I married Peter. It was all arranged that I should soon drop out of your life long before that."

"Not if you had listened to me. I've tried to persuade you to marry me for two years. What's this absurd thing I hear about 'your working'?"

"I am, and it's not the least bit absurd. It's wonderful. I never was so happy in my life."

"But that's not fair, you are taking care of yourself when you are married. What's a husband for?"

"Oh, I'm saving him for the future," she laughed. "It isn't that Peter can't take care of me," she defended him. "I just won't interfere with his work, now, when every day is so important to his career. Besides, I have my own ambition to work out and I don't want him to interfere with that, either."

"What is an ambition? Do tell me, because I should like to recognize one if I saw it. Is it a disease, and can it be cured?" Terry ridiculed.

"Oh, I could tell you all about it, but you never would be able to recognize the symptoms. You should be ashamed of yourself, Terry Wayne, for being such a waster. Where do you suppose the money comes from that you spend?"

"Why, from the old man," he explained, as guiltless as a child discussing money.

"Exactly. But did you never try to estimate what it represents of thought and effort to provide you with so much?"

"You should know better about that?"

One person's thought and effort are enough to waste on it. What I think about these days is the fact that the governor has cut me about twenty per cent, and I can't convince him that my expense is only instead of less."

Everyone is trying to reconcile these two contradictory facts these days. Too bad for you that you don't want to earn your living for awhile."

"Say, what have you got against me anyway?" I know. Just because you have to tell, and want everyone else to break rocks. Must you tell that, because you have an ambition?"

"I just like you enough that I'd like to see you be a man, Terry."

He drew her closer in his embrace as they ended the dance. "And I like you well enough that I still want you."

"Don't be silly," she protested, and turned her attention to someone else.

All her old friends were delighted to see her again. Camilla dissolved into a fit of giggles.

They chided her for her neglect of them. They were curious about her work, doubted or admired her seriousness. She gave them no details concerning her position, only that she had a good job.

She did not wish Alexander Heyt to discover at this crucial time that she had left his fate at the point of her pen.

The test would begin to prove itself soon. The first copy had gone out and was already on the presses, would appear in magazines all over the nation within the following week.

Any upward trend of the Wheathead Cereal business would manifest itself very soon if the juvenile public accepted her Tiny Tots with enthusiasm.

Both Weeks and Bowman were optimistic. "Of course," Mr. Bowman had conceded, "you can't expect enormous returns under present conditions. But if the idea catches on there is bound to be a decided increase."

He was more generous with his praise than Mr. Weeks, chucked over the exploits of father and mother Tiny Tot and their large family, their friends and relatives.

There were, among many others, Uncle Joe, the one-legged sailor, who told the children such fascinating tales; Aunt Min, to whom all the children took their troubles, to be effaced with delectable Wheatheart Cereal cookies and muffins; old Graspy, the miser who hoarded gold and frightened the children from his wretched hut that lured them with its strange and fearful reports. They were so tiny that they slept in peanut shells and made a meal of one cereal flake, were delighted over a treat of a grain of sugar, made a palace of a cereal carton.

HOLDS FALSE TEETH TIGHT AS CEMENT

Plates can't possibly slip when you *sprinkle* on Dr. Werner's Powder. Large sellers in dental goods places say that you can't annoy yet get as liable they actually feel and set like your own. Keeps mouth sanitary, breath pleasant. Special comfort-cushion prevents sensitive gums from getting sore. Small cost—say druggists.

While Camilla worked at her sketches, she lived in a different world, alone. Even Peter never entered there, except to pique his head into her thoughts and entice her away for a few moments at times. She lived her hours there with the children of her fancy and often left them with genuine regret.

During those first weeks, she was so engrossed that she worked late at the office many times. She discovered that when the pleasant, spacious rooms became silent for the night, she accomplished more work in living apart from Peter so that he might work alone, also.

She was more concerned over the fact that Avis had come to live across the hall from Peter, than she admitted. Not so much because she was jealous of Avis' interest in Peter, but because she feared that her presence there would take from Peter just what she had sacrificed so much to provide for him, his right.

Fortunately, for her peace of mind, Peter never told her how many hours he did pass in Avis' company. They were so casual and pleasant, conveniently interspersed with working hours, as she purposely arranged, that he was scarcely aware that he saw more of Avis than he did his wife.

On the night of her reception, Avis took possession of Peter and ignored Camilla so casually that one noticed or resented it. Everyone departed with gushing thanks for a marvelous evening and vaguely impressed with the memory that Avis and Peter were their hostess and host. With Peter's studio across the hall and he a new tenant in the colony, also, it did not seem at all improbable.

Avis insisted that Camilla and Peter remain until the last guests had gone, then she turned her attention wholly upon Camilla. "I can't thank you enough for helping me so beautifully this evening, dear. It was too sweet of you, the way you made it go people together and helped to entertain them. Do stay with me for awhile, while Terry clears up the worst of the wreckage, we can have a bite together. I'm sure you didn't have time to eat—I know I didn't. But I think everyone did have a good time, don't you?" anxiously.

"No doubt about that," Camilla assured her with a smile. "But I didn't do so much. I had a good time, myself."

"I'm so happy if you did, I'm afraid I rather neglected you, depending on you to help me as I did. It kept me pretty busy, telling everyone about Peter. Did you notice how popular he was?" she asked, pleased and impersonal.

"Oh, I saw," Peter objected. "It was You Who were popular and they listened to what you said about me because you were talking."

"Isn't that just like him?" she asked Camilla with exasperation, as

if they shared his idiosyncrasies with a common indulgence of them.

She passed glasses of punch and a plate of sandwiches.

"You will be sending me a board bill some day," Peter remarked carelessly, "if I don't quite eat up here."

Camilla looked up quickly.

Avis laughed. "He has the most exaggerated sense of obligation I ever met. Just because he eats a meal here and I make him stop working enough to drink a cup of coffee occasionally, he wants me to punch a meal ticket for him. Actually, Camilla, with working so hard to finish that figure, I believe he would starve if someone didn't tell him it was time to eat. And since you are not here to do it, I've taken it upon myself to watch over him a little. We don't want our prize winner to collapse at the last minute, do we?"

"Oh, you won!" Peter made a deprecating gesture. "You do like to baby us. That's because you don't know what it means to apply yourself to something that means more to you than your physical comfort."

On didn't she, thought Camilla. But Peter was talking to Avis—not to her. Unconsciously, he had developed the habit of ending the evening there in Avis' rooms, eating a bite and discussing most everything with her.

"I can tell you take such good care of him," Camilla offered bravely, but she grudged Avis even one precious privilege of serving Peter.

"By the way," he changed the subject, "we haven't named that figure yet." Actually, he had only discussed the matter with Avis, but his comment included both girls.

(To Be Continued)

About Sea Serpents

OLD MARINERS Deploy the Unbelieved
of Scientists

If scientists possessed faith ("the size of a grain of mustard seed," several of whom agreed) they would, I suppose, believe in sea serpents.

These salts, during a lively discussion on the mysteries of the deep, declared the attitude adopted by scientists toward sea monsters had been "without imagination or emotion from the very start."

They chided by name Dr. Roy Chapman Andrews, who said recently that Loch Ness monster probably was only a killer whale, and Dr. William Beebe, who thinks it may be merely a mechanical contraption.

"It's downright ungracious of these distinguished gentlemen," said Captain Thomas W. Sheridan, former superintendent of the New York nautical school, "to dispose of the dire denizen of Scotland in such a prosaic manner."

"Why, that sea serpent of Loch Ness has lived the news of the world now for nearly a year. We owe it a debt of gratitude."

"Dr. Andrews and Dr. Beebe," continued Captain Sheridan, "ought to remember the Shakespearean quotation: 'There are more things in heaven and earth, Horatio, than are dreamt of in your philosophy.'

"And," said Captain Fisher, Boston sea author, "they ought to remember too that sea serpents have been earnestly and devoutly believed in by numbers of super-scientific of undoubted veracity since the beginning of time."

"Some of our best literature is about the seeing of these beasts."

Captain Frederick Fendell, assistant marine superintendent of the international mercantile marine, said "one of the greatest authorities America ever had on sea serpents" was the late Captain Clausen of the magnetic ship Carnegie.

"He used to tell us by the hour," said Fendell, "about seeing sea serpents. He told us once he saw one of them close a school of whales round a Norwegian fjord until the water boiled with fury and villages miles inland were swept by the waves."

"None of these seamen would admit ever having seen a serpent with his own eyes but all agreed that 'what scientists need is a grain of faith in sea beasts' and a mite more of veracity."

It's very embarrassing when one's wife is jealous, and very humiliating when she isn't.

The brink of Niagara Falls is receding at the rate of 2½ feet a year

CRAWLING ABOUT WITH LUMBAGO

Here is some useful information for anyone troubled with that uncomfortable complaint, lumbago. A woman writes:

"For two years I suffered from lumbago. During wet weather, I could only turn in bed with great effort and pain. I was so stiff and ached so much. Two years ago I had both lumbago, sciatica, and cramps about for a fortnight, feeling very sorry for myself and looking 100 instead of 33. Some said, 'Try Krusen's Salts,' so I did, and I have been them ever since. Since then I feel that I hardly ever get a hint of lumbago these days." —(Mrs.) G. P. C. Why is it that Krusen's is so effective in soothiing lumbago? Simple—because it goes right down to the root of the trouble and removes the cause, which is an impure blood-stream. The six salts in Krusen's keep the blood pure, pure and vigorous, promoting a circulatory regularity of all the organs of elimination.

Little Helps For This Week

"If thou draw out thy soul to the hungry, and satisfy the afflicted soul, then shall thy light rise in obscurity and thy darkness be as the noonday, and the Lord shall guide thee continually." Isaiah 43:10-11.

If thou hast yesterday thy duty done, And thereby cleared firm footing for today. Whatever clouds make dark thy sun, Thou shalt not miss thy solitary way.

O Lord who art our guide even unto death, grant us I pray Thee grace to follow Thee wheresoe'er Thou goest. In little daily duties to which Thou hast called us, how do we our wills to command, obedience, patient under pain or provocation, strict truthfulness of word or manner, humility and kindness. In great acts of duty or perfection, Thou shouldst call us to them, uplift us to self-sacrifice, heroic courage, laying down of life for Thy Truth's sake, or for a brother.—C. G. Rossetti

Collar Of Pure Gold

Valuable Antique Dating From About 100 B.C. Is Found In Ireland

A collar of pure gold which is believed to have been made about 100 B.C. has been found at Birrion, County Clare, Ireland. Its discoverer was a local farmer who noticed it glittering in a cleft of rock. The National museum has claimed it as a treasure trove. Dr. Mahr, keeper of Irish antiquities in the national museum, has confirmed the belief of its antiquity. The type is well known, he said in an interview, and four similar ones are in the museum.

Drive Against Lotteries

Revealing plans for a drive against Chinese lotteries, a type of gambling said to be sweeping Winnipeg, city police stated unemployed, in many cases, were wagering their relief vouchers in the hope of reaping a sudden fortune, rather than spend them for bread, milk and other necessary provisions.

Using Diving Bell

With the aid of a great diving bell, Dr. William Beebe plans to go 3,000 feet below the surface of the Atlantic near the Bermudas. He is carrying on the work solely for the purpose of making scientific observations of as large a number of deep sea creatures as possible.

Kidney Troubles

cause poisons to accumulate in the system and bring on persistent Backache, Lumbago, Rheumatism, or Sciatica. Take Gin Pills to remove the kidneys to a healthy condition and eliminate the poison from your system.

Ask Mother—
She Knows

Mother took this medicine before and after her baby came. It gave more strength and energy when she was nervous and rundown... kept her on the job all through the pregnancy. No wonder she feels so good now.

LOCAL & GENERAL

Mr. and Mrs. Jack Fleury leave Friday for Jasper for a month's vacation.

Mrs. Bolander left on Tuesday for a six weeks' visit to Kitchener, Ontario.

Miss Mary Hughes of the Swift Current Hospital spent the weekend with her mother here.

Dance, Schoolroom Fri., June 15—Allison Mack's Orchestra. Proceeds in aid of the Elks' Girl's Softball Team. (23c)

We have a fresh supply of scratch pads now ready. Especially useful for school, store or telephone, 2 for 5 cents—Pioneer Office.

Under the auspices of St. Cyprian's W.A. a Sale of Home cooking will be held and Afternoon Tea served in the Leuzer Block, Sunday June 16th, 3 p.m., followed by the Business Men's Supper at 6 o'clock. W.I.W.A. members kindly bring donations. Thank you.

Mrs. Lydia Brown went to Edmonton this week to take the position of relieving nurse at the Royal Alexandra Hospital for the summer.

Mrs. E. G. Ranton who has been visiting relatives at Edmonton for the past month returned home last weekend.

Messrs. A. Brusso and A. McNaughton are attending the convention of municipal secretaries being held at Edmonton this week.

Mr. and Mrs. Fred Hawkes, Mr. Bob Hawkes and Miss Olive Robinson of Calgary visited with Mr. and Mrs. Herman Hawkes on Sunday.

Mccormick-Deering New All Steel Manure Spreader at the Same Price as the regular old wood spreader. This is a sensation—just like the new mower! (22c)

We are pleased to see that Mr. Geo. Watson who recently underwent a major operation is able to walk around again and visit with his friends.

Mr. and Mrs. Alex Ingraham of Orittina, Ont. called on Mr. and Mrs. Chas. Mortimer on Tuesday. They are visiting with Mrs. Mortimer's parents at Orls.

Mr. and Mrs. C. R. Ford have moved into one of the A. A. Perrin houses on the highway east of the tracks. Mr. Mc. Dole, new manager of the Royal Bank, will occupy the house on Boundary Street vacated by Mr. and Mrs. Ford.

Mr. and Mrs. Louis Hammer Olds, announce the engagement of their youngest daughter, Grace Alta, to George Oakley Vandervoort, of Bentley, son of Mr. and Mrs. Arthur C. Vandervoort of Stirling. Out the wedding to take place the latter part of June—Olds Gazette.

The many friends in this district of Mrs. J. Walter, who taught so successfully in Inglewood two years ago, will be interested to hear that she is leaving at the end of this week for a 3 months' visit to her old home at Birkenhead, England.

Mountain View Notes

The monthly meeting of Mountain View W.I. will be held in the Hall next Thursday, June 21st.

Miss Doris Brown was a Calgary visitor Saturday.

Mr. and Mrs. Paul Thomas of Betchow were Sunday visitors with Mr. and Mrs. Basil Atkinson.

The recent rains were very welcome to the district. A heavy hail storm Monday damaged the crops in Moma and Neapolis districts, and in the latter district several residents report broken windows.

LOCAL & GENERAL

Mrs. Tom Ward of Portland, Ore. and an old resident of this district, is visiting with the Deadrick families.

Mrs. George Smith and Miss Lucille left last week for a vacation at their old home at Missouri.

Mr. and Mrs. Russell Bersch are spending a week's vacation camping in the Clearwater country.

Mr. and Mrs. Abe Snyder left on Tuesday for a trip to Montreal, Kitchener, Sarnia and other points.

Mr. and Mrs. A. Brusso drove to Brooks on Sunday to attend the funeral of Mr. S. Ainsley, a brother-in-law of Mrs. Brusso.

Miss Lydia Brown went to Edmonton this week to take the position of relieving nurse at the Royal Alexandra Hospital for the summer.

Mrs. E. G. Ranton who has been visiting relatives at Edmonton for the past month returned home last weekend.

Messrs. A. Brusso and A. McNaughton are attending the convention of municipal secretaries being held at Edmonton this week.

Mr. and Mrs. Fred Hawkes, Mr. Bob Hawkes and Miss Olive Robinson of Calgary visited with Mr. and Mrs. Herman Hawkes on Sunday.

Mccormick-Deering New All Steel Manure Spreader at the Same Price as the regular old wood spreader. This is a sensation—just like the new mower! (22c)

Mr. and Mrs. C. R. Ford have moved into one of the A. A. Perrin houses on the highway east of the tracks. Mr. Mc. Dole, new manager of the Royal Bank, will occupy the house on Boundary Street vacated by Mr. and Mrs. Ford.

Mr. and Mrs. Louis Hammer Olds, announce the engagement of their youngest daughter, Grace Alta, to George Oakley Vandervoort, of Bentley, son of Mr. and Mrs. Arthur C. Vandervoort of Stirling. Out the wedding to take place the latter part of June—Olds Gazette.

Mr. Geo. Hawkes prefers hunting with his camera rather than with a gun. His latest acquisition is a splendid picture of a Hungarian pheasant's nest with 15 eggs. George has a splendid collection of birds, animals, snakes, flowers, etc. all shot out in the wilds with his camera.

Mr. Brusso had the misfortune to be disqualified at the inter-scholastic track meet held at Calgary on Saturday. Mr. Brusso was holding 2nd place in the fastest heat run in the 100 yards event, but was disqualified for running out of his lane. Otherwise he would have competed in the final—Better luck next time, Alf.

The 4th annual basket picnic and field day of the Avondale Shorthorn Club will be held at the E.P. Ranch west of High River, Sat., June 16th. A special effort is being made to provide a good time. Interesting speakers, inspection of livestock, judging, and games for the children will be included in the program.

Charlie Mortimer's reputation as a fisherman has become so widespread that a party from Calgary came up Sunday to join him in trying to attract the "big ones." The party included Mr. Howard Swingle and Mr. A. J. Hilliker, circulation manager for the Calgary Herald. They had fair luck, but they do say that Mr. Hilliker has greater success in fishing for newspaper circulation—than fishing for trout.

Billy Parker, 7 year old son of Mr. and Mrs. Bruce Parker, was thrown and injured on Saturday when riding a horse "doubledeck" along with Nellie Myers. A number of children were riding together along the road when the horse started to buck and threw both riders. The girl was slightly injured, but the boy was rendered unconscious. He was severely injured on the back of the head and was unconscious for about two hours.
